OBJECTIVE

Hello, I'm Tugce. I graduated from Uludag University as a Textile Engineer. My curiosity about the software systems used in the companies where I did my internship in the field of textiles made me realize that I needed to improve myself in the field of software. You are looking for a developer who will build robust and scalable front-end and back-end products with great user experiences. Let's shake hands with me.

SKILLS

HTML - CSS
JAVASCRIPT - REACT
SQL - NODEJS
PYTHON
